SCHLEGEL & FOTTLER,

Seedsmen,

26 South Market Street,

BOSTON, MASS.

To Our Customers:

Greeting.

In presenting our Autumn Catalogue for 1898, we wish to thank our many friends and customers for their kind recommendations and patronage. Our efforts to please and satisfy those who have dealt with us appear to be well recognized — a fact that brings us much pleasure.

Although we have always chosen to follow a rather conservative course, our record shows constant and steady progress; this encourages us to continue the straightforward, systematic policy in our business affairs that we have from the first adhered to.

Our business success has been largely due to the ***superior quality*** of the stocks we sell; ***we deal in no second grade of anything.*** As an illustration of these facts we will state that many of the most prominent seed-houses in this country and Europe often send to us for various special strains of seed to grow their stock from. We do an extensive business with two very critical classes of customers: Market-gardeners and regular Florists. Seeds which satisfy these branches of trade are certainly safe for the general public to use. Our seed-rooms (the largest in the city) enable us to carry large stocks of seeds, and we are constantly improving our business facilities.

Postage

Is paid by us to all points in the United States on all ***Bulbs*** at single and dozen prices quoted in this catalogue, except where noted.

Our Bulbs

Are of the very highest quality and at the ***Lowest Prices.*** Imported direct from the best growers in England, France and Holland. No better are sold in this country.

Remittances

May be made at our risk by draft, money order, American Express Co.'s money order, cash by express or registered letter. Postage stamps may be sent for small amounts.

Address, Etc.

Purchasers will please be particular in ***plainly*** signing their ***Name, Post-Office, County and State,*** and mention mode of conveyance, whether by ***Mail, Express or Freight.***

Situations for Gardeners and Farmers.

We have on our books the names of reliable men, experienced in all branches of gardening. Also, men for second places and general work on a gentleman's place. If, at any time, our customers or others are in want of such men, they would do well to call upon or write us. *No fees are ever charged.*

Our Catalogue of Seeds for the coming year will be mailed to all regular customers as soon as issued, to all others upon application.

Hyacinths.

GARDEN CULTURE.— The bulbs may be planted from October to December in any good well-drained garden soil. They should be set six inches apart, and three to four inches deep. *Before the ground freezes* cover the beds about six inches deep with leaves or other good litter to keep out the frost. The covering can be kept in place by pieces of boards or boughs and should gradually be removed upon approach of warm weather in Spring. The bulbs should be left until the foliage turns yellow, when they may be lifted, dried off and kept in a dry, cool place for replanting.

CULTURE IN POTS.— Select solid, heavy bulbs and plant as early as possible, using a four or five inch pot for a single bulb. Fill the pots with a light, rich potting soil, and have the top of the bulb just above the surface, give a good watering and set away in a cool place, covering them with about five inches of sand or coal ashes. This prevents the bulbs from rising while the roots are growing and keeps them quite moist. In about eight weeks they may be taken to the room in which they are to flower. By bringing in a few pots at a time about two weeks apart a succession of bloom may be had.

CULTURE IN GLASSES.— The single varieties are best adapted for glass culture, and the best named sorts should be selected. Use soft water in filling the glasses, put in a little charcoal and allow the bottom of the bulb to just come in contact with the water. Keep in a dark, cool place till the roots are about six inches long, when they may be brought into light and warmth to bloom. Add water occasionally as it evaporates, and the nearer they can be kept in a temperature of 60° F. the better will be the results.

MINIATURE OR DUTCH ROMAN HYACINTHS.

These may be planted close together in pots or boxes, also in beds in the open ground with charming effect. We can furnish them in the following colors.

Dark Red, Rose and Pink, Pure White, Dark Blue, Light Blue, All Colors Mixed.

5 cents each, 30 cents per dozen. By mail, 45 cents per dozen.

EARLY ROMAN HYACINTHS.

A charming class specially adapted for forcing and house culture, each bulb producing several graceful spikes of delicately perfumed flowers. They may be had in bloom from November to spring by early and successive plantings and treating as recommended for Hyacinths on page 1. Bulbs may be planted close together, 3 bulbs in a 4-inch pot.

Tulips.

Universal favorites and always attractive from the beauty, brilliancy aud variety of color, which make them one of the most popular flowers for early spring display in the garden, or for winter flowering in house and conservatory. They are extremely hardy and of easy culture in any good garden soil, seldom failing to give the greatest satisfaction. Clumps of double and single sorts planted together among the shrubs and perennials will give a longer season of bloom than if either were planted alone. The bulbs should be set 3 to 4 inches deep, and 4 to 6 inches apart. Culture as recommended for Hyacinths, page 1.

All Tulips sent by Mail at the dozen price.

GENTLEMEN :—Your Hyacinths, at 60 cents per dozen, were the finest I saw last winter. Most of them produced two spikes of bloom and some had three, all of good size. S. C. BROWN.

Trumpet Narcissus.

Narcissus or Daffodils.

In the front rank of popularity is placed this most beautiful and fragrant of our flowering bulbs, doing well in almost all soils and situations—among the grass, under trees and in shady borders. Once planted they need no further attention, as they multiply and give larger and finer results each year. For house culture they are equally desirable and should be treated as recommended for Hyacinths. They are all perfectly hardy, excepting the Polyanthus varieties, and these, with a good covering to exclude the frost, will give larger and better flowers than when grown inside.

Crocus.

Crocus.

One of our earliest spring flowers, brilliant and universally admired, occupying a prominent place in every garden. When planted in large groups or lines of distinct colors the effect is striking. Flower beds and borders are made very attractive with a few clumps or rows of the different colors. They thrive in any soil or situation, but to be had in the highest perfection they should be grown in a deep, rich, sandy loam, and in a sunny location. Plant two to three inches apart and three inches deep. Best results are obtained from early planting.

LARGE FLOWERED NAMED CROCUS.

These are large selected bulbs of the best varieties, and are noted for the immense size of their flowers and richness of color. *The small, cheap bulbs we do not handle, as they fail to give satisfaction.*

Lilium Harrisii (Bermuda Easter Lily)

Lilium Auratum.

LILIES.

In the bulb garden Lilies rank first in importance. They are stately and beautiful, matchless in form and variety of color, while possessing the most agreeable perfume, and for general effect they have no rivals. Bulbs should be planted six inches deep as soon as they can be obtained after ripening, some being ready in August while others are not ready till October or November. They thrive best in a well drained, deep, loamy soil, made rich with thoroughly rotted cow or sheep manure, and an inch of clean sand placed under and over the bulbs when setting; manure should not come in contact with the bulbs as it causes decay. Top dressing is the better way to enrich the soil after the bulbs are once established. The beds should be well covered in the fall with any good litter that will exclude frost.

All varieties of Lily bulbs sent by mail at price of single bulbs.

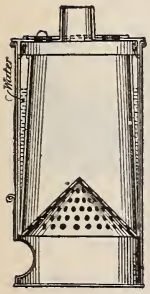
FUMIGATORS.

For Smoking Greenhouses and Conservatories.



Perfection, (See Cut.) The neatest, most durable, and most practicable fumigator ever offered. By following the directions this fumigator will last for years, it has practically three bodies, the two inside ones forming a water tank, this tank being between the fire and the outside body, prevents the body from burning out.

The tank should be filled with tobacco water, when in operation a vapor arises and mixes with the dry smoke from the stems, producing a dampened smoke more dense and less injurious than from any other fumigator made.

	Each.
No. 1 holds one peck of stems	$3.00
No. 2 holds half bushel of stems	3.75
No. 3 holds three-quarters bushel of stems	4.50
No. 5 holds one bushel of stems	5.50

Boston. Self-acting, and may be left with perfect safety; all the material consumed and gives off a dense smoke; made of extra heavy galvanized iron.

Franklin Park Lawn Seed.

OUR SPECIALTY.

TRADE MARK REGISTERED.

The mixture of grass-seeds we sell under this name is made from the identical formula used by the Park Commissioners of the City of Boston in their work of laying out the beautiful lawns and terraces which add such a charm to our new parks.

The Franklin Park Mixture gives a fine, smooth, velvety sward within a very few weeks after sowing. It is composed of clean seed of the finest and and most desirable permanent grasses known, and it contains no chaff nor foul seeds. Weight per bushel about 32 pounds.

The very large demand for this lawn seed has necessitated our having the name "Franklin Park" registered as a trade mark, in order to protect ourselves from imitators.

September and October are most favorable months for sowing.

We put this seed up in packages — all of which bear our name — containing quantities as follows:

64 lbs., sufficient for one acre . Price, $16.00	16 lbs., sufficient for one-quarter acre Price, $4.00
32 " " " one half acre " 8.00	Price per pound 30

FINEST ENGLISH MIXTURE.

This mixture, made from our own formula, we have sold for many years, and it has given very general satisfaction. Weight per bushel, 16 lbs. Per ½ lb., (1 qt.) 20 cts.; per lb., (2 qts.) 35 cts.; per bushel, (16 lbs.) $4.00.

SEEDS FOR GOLF LINKS AND PUTTING GREENS.

A specially prepared mixture for Golf Links, without clovers. Per bushel, $5.00.

A carefully prepared combination of grasses and clovers for sowing on Putting Greens, to produce a dense, close sward. Per bushel, $6.00.

Add 8 cents per pound to prices of all Grasses if wanted by mail.
